It supports guitars, ukulele, bass, violin, and piano, etc. What people say: the exact tuner that allows Change in concert setting. Very effective for setting up solfeggio. - Monkeydust0042 is very good and very detailed and functional because you can tune even with the harsh environment of the best truth applications - acordenmazizo1 bought Elegantune after trying the lite version for a year. This is by far the best tuner on the App Store! - SC Tennis follow us on Twitter: @elegantune ----- Elegantune is specially designed for string instruments such as guitar, bass, ukulele and violin. Elegantune can also be used to check your piano whether it's under a good condition, we especially design a curved type that can easily and lively reflect your device. You fell very easy as a very precise adjustment aid. Design humanization and set three degrees with high sensitivity, so that you can better adjust your device due to environmental disruption. Features: 1. Cover a wide range of pointers and show up quickly; 2. Easy to view pitch, frequency, tradition and transmission mode; See the device sculpture in the composition of the signal and the curved tradition of fluctuations, and directly change the stability of the chords; Three levels of anti-noise settings: the lowest anti-noise ability can fulfill short tone detection of 0.1s. The highest anti-noise ability can accurately detect standard ground even in 4x base band amplitude soufflies. The default level II is the highest level; 5. Three precision options: 0.1 cents, 1 cent and 3 cents. The default option O is the best accuracy; 6. Three input modes: microphone, pickup and Bluetooth; 7. Adjustable A4 calibration at an increase of 1 Hz; 8. Adjust frequency range: 23HZ -6400HZ; 9. Supports tool transfer. About signal curves and curves of traditions: Combining signals with curves: In our piano tuner, signal reduction is the result of offset frequency of an important reference value. The price of our professional software on the market can be 100 to 599USD, which may be suitable for the general public, through simplization, we make a fully functional tuner for the regular instrument. Benefits of signal curve and tradition curve: 1. Sound stability is an important factor when you decide to buy some tools; 2. Whether the instrument is old, dirty or needs to change chords; 3. Among the three anti-noise levels, when adjusting to the lowest level you have a sound frequency that is hard to capture detection, if it's very short above the ground. Now we can even recognize 88 tons of piano which is definitely unique for the current conventional tuner. 4. Strong bass picking technique will get you the required date on the curve. Can be adjusted even for wind tools and tubes. Elegantune has a history of 15 years in designing a cermatic tuner. Our company has designed many cermatic theons for famous and independent brands for various purposes such as pointers and for piano. With the world's most advanced sound tuning technology, this is it The first time that our company has designed our own brand - tuner program. After experimenting on hundreds of tools, we now particularly recommend Elegantune, which works perfectly for the majority of the instruments. Elegantune has been updating and improving for a long time, initially we used to point out the Strobo Peterson tuner mode and the benefits of other products, but we don't have a great success. Under one year of modification and improvement, the user interface and the practicality of our products are both very large upgrades. Our goal is to make every customer that we choose feel satisfied and comfortable. We trust we will be the best and look forward to receiving your feedback on our products. We will give you a satisfactory response. Mirror Apk 1.: Download apk insTuner free - terrible cermatic tuner review @ @ @ @ @ I Viloa and I tried to tune my A. Tuner said that A is but the string was almost broken. bad plan. Don't use it. I am disappointed, dissatisfied and embarrassed. Now I have to go to my teacher and explain everything. He is crazy right now and will hate me because of this program. I hate this program. If I could give zero stars, I would. The tuner is very great sound amazing without supporting the program I have used this program on my iPad for a while now, but since the last time I updated my iPad app has not opened 100%. I can't even connect with the app developer. When the program worked properly it was great. Not so much now. It seemed terrible that viola was not a convert and she had to use it. .Y.Y. Tuner that shows iPhone 4 in pictures and can actually be supported on iPhone 4 4
